ODILE MASENGESHO

Full-Stack Developer (Python / Django / React)

Kigali, Rwanda | +250 780 283 130 | masengeshoodile@gmail.com | github.com/OdileMas

PROFESSIONAL SUMMARY

Full-stack developer with a Bachelor's degree in Software Engineering (expected October 2026) and hands-on experience across backend, frontend, and mobile development through production internships and intensive training programs. Currently working as a Software Developer Intern at Travelis Rwanda Ltd on the **Fundi Mobile** platform (connecting customers to nearby verified construction technicians and artisans based on specific maintenance problems) while deepening backend specialization through an intensive Django training program at Solvit Africa. Experienced across Python (Django, FastAPI), React, Flutter, Node.js/Express, REST APIs, PostgreSQL, and MongoDB. Fast learner with strong software architecture foundations, disciplined Agile collaboration, and a passion for engineering reliable systems that remove friction from everyday life.

TECHNICAL SKILLS

Backend & Frameworks: Django (hands-on training & projects), FastAPI, Node.js, Express.js

Frontend & Mobile: React, React Native, Flutter (Dart), HTML5, CSS3, JavaScript (ES6+), TypeScript

Databases: PostgreSQL, MongoDB, ORM data modeling, query optimization

Languages: Python, JavaScript, TypeScript, Dart, Java, C++

Core Concepts: RESTful API design, Geolocation matching, Authentication/JWT, Agile/Scrum, Git/GitHub

Other Tools: Figma, Canva, Excel, Google Sheets, Postman, Linux

Soft Skills: Problem-solving, teamwork, communication, attention to detail, adaptability

DJANGO TRAINING & HANDS-ON PROJECTS

Django Full-Stack Training Program | Solvit Africa, Kigali *2026 (3-month intensive program, in progress)*

- Undergoing intensive, hands-on training in Django covering backend architecture, the Django ORM, database design, and REST API development.
- **AgriConnect (independent project):** Built a Django web application connecting farmers directly with buyers, removing middlemen so farmers receive fair, direct payment for their produce.
- **School Management System (independent project):** Built a Django application for managing students, teachers, attendance records, and exams.
- **FitSync (team project):** Contributing to a Django-based fitness application that generates personalized workout and nutrition plans based on a user's available equipment, budget, and food access; roadmap includes wearable device integration and coach support features.

PROFESSIONAL EXPERIENCE

Software Developer Intern | Travelis Rwanda Ltd, Kigali *2026 – Present*

- Working as a software developer intern on **Fundi Mobile**, a platform connecting customers directly to nearby verified construction technicians and artisans (fundis) to make hiring easy and responsive based on specific problem types (plumbing, electrical, masonry, carpentry).
- Engineered proximity-based discovery and service booking flows, streamlining communication between clients and technicians.
- Collaborated with the engineering team on RESTful API design, database querying, state management, and testing across staging and production environments.

Software Development Intern | City of Kigali (in partnership with ICT Chamber) *March 2026 – May 2026*

- Participated in the design of a Smart Entry & Service Delivery System to improve service efficiency and replace manual paper operations.
- Contributed to systems requirement analysis, design discussions, and implementation in a multidisciplinary Agile team.
- Supported testing and debugging efforts to ensure system reliability and seamless operational workflow.

Software Development Intern | IDA Technology, Kigali *March 2025 – May 2025*

- Designed and developed a responsive website to manage religious community services and improve access to information.
- Built features displaying community service schedules and gathering times for church members.
- Collaborated with the backend team to integrate APIs enabling users to access baptism and marriage certificate services online.

Web Development Trainee | AFRETEC Project Workshop, Kigali *February 2025 – March 2025*

- Designed and built a location-based website using HTML, CSS, and JavaScript.
- Learned Python programming fundamentals and API integration concepts.
- Worked in a guided team environment under professional mentorship.

Bridge Program Student | Carnegie Mellon University Africa, Kigali *October 2024 – December 2024*

- Participated in an IoT-based Air Monitoring System project using temperature, humidity, and LED sensors.
- Gained foundational experience in embedded systems and IoT development.
- Developed technical presentation and pitching skills.

EDUCATION

BSc, Software Engineering | University of Rwanda *2022 – 2026 (Expected October 2026)*

Focus areas: Software development, Networking, Embedded systems, IoT, Data analytics.

Advanced Level Diploma | École Secondaire Saint Vincent Muhoza *2018 – 2021*

Mathematics, Physics, Computer Science.

CERTIFICATIONS & AWARDS

- AFRETEC Project Workshop Certificate (2025)
- Digital Talent Program – Software Development: Beginner, Intermediate, Advanced (2025)
- Resonate RISE & STEM Program Certificate (2024)
- Code Camp Python Beginner Certificate (2024)
- CMU-Africa Bridge Program Certificate (2024)

LANGUAGES

Kinyarwanda: Native | **English:** Fluent
